PORT NOTES

1992 Similar to 1991 but only declared by those who did not do so in that year. Again, a small vintage that needs a few more years.

1994 The climate was near perfect in the Douro for the making of top quality port, the late frost in May reducing yields by 30% and making the small quantity of Port produced even more concentrated than usual. Big full bodied wines with excellent staying power and classical potential summarizes this vintage - some drinking now.

1997 Superb quality, but quantities very limited from this vintage, which produced smaller yields than in 1994 - a vintage for the medium to long term.

2000 The wines are full and rich in the mouth with fresh blackberry and red plums. Laying down the wines for fifteen to twenty years will certainly be rewarded.

2003 After the magnificent hot summer they had in the Douro and we had here, conditions resulted in wines that will have up-front appeal but maybe a reduced life span?

2007 Looks set to join the ranks of the great vintage ports. Its wines already imbued with an extraordinary purity of flavour, once again a small volume but will age well into the future.

2011 The weather conditions throughout the whole growing season have been described as perfect. The 2011 vintage is being lined up to be amongst the greats.
